

Maths Competitions

Dear KS2 Pupils,

Maths in Real Life Photograph Competition

Where do you see Maths in real life? Is it reading the time on the clock in your kitchen? Weighing ingredients for a recipe, or using ratio to make dinner for large groups of people? Working out the change when you are shopping? Calculating how many packets of sweets you need to fill your party bags? The options are endless.

This competition is open to KS2. We want the most interesting, and maybe surprising, examples of where you see Maths being used in real life. You need to take a photograph and submit it along with a short explanation of what is happening and where you spotted the maths. Many of these will be used on display and prizes will be awarded for the best in every year group.

Parent's Category - If your parent's brains are whirring, there is also a parent's category. This will hopefully inspire them to join you.

Entries due by Friday 14th July to Miss Green (5G).

Times Tables Rockstars – Battle of the Bands

Following on from the success of last terms *Battle of the Bands*, each year group will participate in another battle, however, this time the children will be competing to win a film afternoon in their classroom.

The competitions will be as follows:

Year 3 vs. 4

Year 5 vs. 6

The battle will run from 8am on Friday 16th June until 8pm on Thursday 29th June.

During the battle, children will also be competing for *Most Valuable Player*; this will be awarded to the player in each battle who makes the greatest contribution. Winners will be announced in Celebration Assembly on Friday 30th June.
